

## Project for Improving Coastal Security in Alanya

### ALTID's Project for Improving Coastal Security in Alanya

with reference number TR61/11/TURIZM/KAMU01-31, which is sponsored by the Western Mediterranean Development Agency (BAKA) under Financial Support program for 2011 and will be completed within eight months, comprises works and activities to be carried out on Kleopatra and Keykubad beaches in central Alanya. The project aims to ensure services of high quality on beaches in Alanya which annually hosts three million visitors in average while ensuring their satisfaction. It will also contribute to the promotion of our region and extend the tourist season. The quality of services offered by businesses and kiosks on the beach will have been increased and their preferability will have been increased through the project. The project consists of three main activities.

#### 1- Letting disabled individuals to swim under supervision of attendants

An exemplary sunbathing area, a promenade, and a shower system built on Kleopatra Beach enables disabled individuals to take a sunbath and to swim under supervision of attendants. Five toilets are being built for the disabled. This exemplary project will also contribute to efforts under a project entitled Alanya: A Tourism City With No Obstacles, which aims to ensuring accessibility to the urban part of Alanya for all.

Observation towers have been improved as part of the project. In addition, silver lifeguard and first aid courses have been organized for people working at kiosks, lifeguards on observation towers, and private security guards assigned to the beach. A total of 39 trainees who have successfully completed the first aid - training course attended by 41 people received first aid certificates in addition to 11 silver certificates, including six bronze + silver and five silver certificates.

### 3- Rapid response to drowning incidents and transportation of injured persons to hospital

Sea motorcycles equipped with 1 ATV and two stretchers will be used for watching and rapidly responding to drowning and other incidents which may occur along the coast and beach and on sea. Rapid response on the beach by personnel with silver certificates assigned to observation towers will be possible under supervision of the coordination center. In addition, the investment to be made under the project will contribute to efforts coordinated with the municipality and law enforcement units.

### 2- Enhancing beach security by installing a MOBESE security system

A MOBESE (mobile electronic system integration) system installed on Kleopatra and Keykubad beaches in central Alanya will enable the coordination center, municipality, and the police department to monitor those areas.
